Figure E6. Live telemetry evidence

Stored workflow-associated records; no independent ground-truth performance labels.

Stored rows	Bootstrap-rules rows	Null LSTM scores	Live-LSTM scored rows
200	200	200	0
stored evidence	stored evidence	stored evidence	stored evidence

Stored fault-mode field (workflow-associated observations; not independent labels)

Fault-mode counts: error = 168 | latency = 1 | normal = 31

Data source: live_local_host_and_http_probe = 200

Source: research/exports/telemetry.csv; Phase 2 reconciliation.

Boundary: No live ROC, PR, accuracy, specificity, FPR, or alarms-per-hour figure.
